

Imtex 2016 was very successful for Grind Master. With over 600 footfalls, 300 Enquiries, 15 Orders we see a very positive energy in the manufacturing industry. Customers from a wide variety of industries such as Automotive, Steel, Cookware and Tubes visited and showed keen interest in our products.

We received a number of visitors from **Aerospace Industry**, which is a fast growing industry in India. Deburring of Aerospace components is very critical and Grind Master has the full product range for meeting mission critical quality requirements of such components. Most visitors to Grind Master stall were enthusiastic about the new innovative technologies on display, such as the Flexigrind TGM10 Series machine.

Apart from the news from Imtex, this newsletter includes article about “Majhi City takatak”, a Solid Waste Management Initiative in Aurangabad that we are proud to be associated with.

I would like to thank all the readers of this newsletter for their active feedback and look forward to further inputs.

Best Regards
Mrs. Mohini Kelkar
Director - Grind Master

Imtex 2016 Metal Forming Grind Master Launches New Products

Grind Master has unarguably the widest range of metal finishing machinery in the world. We take pride in being the **One Stop One Shop Total Solution Provider for Metal Finishing**. This Capability was displayed at Imtex 2016 - Forming at Bangalore with a successful launch of 2 New Products for the Sheet Metal Industry.

The 2 Machine Models released were CF300 and Flexigrind TGM10. The CF300 is an advanced version of Conveyorized Deburring Machine, with advanced features such as Touchscreen User Interface, Smart Phone Application Connectivity and a Robust International Quality Build. Using Modular Elements such as Belt Grinding Heads and Planetary Brush Deburring Heads, the CF300 is a workhorse for high volume deburring of punched, fine blanked parts in Automotive and General Engineering Industry.

Grind Master is in collaboration with Timesavers Holland for Sales And Service of Advanced Wide Belt Grinding Machines for the past 10 years, successfully installing over 60 machines in India. Responding to the needs of batch type production, and low volume manufacturing, Grind Master is proud to introduce **Flexigrind TGM10**, a manual Flat Part Grinding and Deburring Machine. This innovative machine is a boon for Fabricators and Low Volume High Quality part makers including Aerospace Industry. Introduced Worldwide by Timesavers 1 year ago, there are already over 500 Installations of this machine. Grind Master will be manufacturing this machine from its Facilities in Aurangabad from now. "Users have received this machine really well, we booked more than 10 machines during the show itself", says Nilesh Pathak, Manager - Sales South India.

Grind Master Partners Initiative to make Swachh Bharat in Aurangabad

Grind Master is the proud partner of the Majhi City Taka-Tak campaign with the Aurangabad Municipal Corporation (AMC) and Confederation of Indian Industry (CII). This unique and path breaking initiative aims to bring Aurangabad to number 1 position under the Swachh Bharat Ranking in India. The focus of this initiative is to maximize resource recovery from waste and inject dignity of labour into the SWM processes.

Says Gauri Mirashi of Civic Response Team, the executing agency of this project, “Grind Master has been our first and solid partner right from when we began our journey towards zero-waste at Sindhi Colony, through our learning phase with Ward 84 and 72, and now, they have been the first to drive the Majhi City Takatak Campaign, by funding the training & leadership programs for all 100 Jawans and 300 Safai Karmcharis. Indeed, Grind Master has been the pioneer of the Solid Waste Management movement in Aurangabad that has now taken such a strong and solid shape.”

The aim of the campaign is to demonstrate best SWM practices in compliance with the Municipal Solid Waste Rules, 2000, with the wilful participation of all stakeholders to achieve:

1. 100% segregation at source
2. Provide door-to-door collection of segregated waste through efficient route mapping and optimization
3. Decentralised treatment of organic waste
4. Resource recovery of recyclables.
5. Eliminating dumping of waste at open spaces like Naregaon
6. Changing systems to include dignity of labour at each stage

In Phase 1 of the campaign, CRT, with the support of Grind Master Machines Pvt. Ltd. designed and conducted a comprehensive capacity building program on Solid Waste Management (SWM) for the Sanitation Department of Aurangabad Municipal Corporation (AMC). Along with this orientation and planning sessions have also been conducted with the ward officers and sanitation inspectors to make the first 12 wards waste free. The Majhi City Taka-tak campaign was launched across the city on the 24th January with a resource recovery drive.

“I’m very proud to say that the Grind Master family whole-heartedly supported the campaign at the Bibi - ka - Maqbara, volunteering to organize the event as well as to participate in the clean-up drive. Over 150 bags full of plastic and paper were recovered from the city. This material is being recycled with the help of the informal sector.” Said Sameer Kelkar, Executive Director, Grind Master

This campaign will change the face of Aurangabad and set an example for other cities to adapt the best SWM practices and Grind Master Machines Pvt. Ltd. is proud to be a solid partner in this historic endeavour.
