

Dear Friends

We have had a terrific Imtex 2017 in Bangalore this year. With over 2000 visitors to our booth the response can be said to be overwhelming.

The Grind Master Group is expanding and transforming into a Global Technology leader, our presentation at Imtex reflected this change. With state of the Art technology on display in NANOFINISH, Robotic Automation and Metal finishing, we displayed new products on our booth. Our discerning customers and partners have appreciated this INNOVATION value of the company.

The recent Acquisition of French Machine Tools Builder SPMS was also very well received and we are proud of being a global company now.

Imtex Exhibition always brings a lot of learnings, and we endeavour to put some of these into practise in the next few months. Many thanks to all our well wishers for making this Exhibitions a success.

Best Regards

Mrs. Mohini Kelkar

Director - Marketing and Business Development

Sameer Kelkar presented on “Latest Trends in Microfinishing of Automotive Powertrain Parts at ISMT, the talk was well received an appreciated by discerning audience from Manufacturing Industry.
