

Dear Friends

I am pleased to inform you that we have again received the Star Exporter Award from EEPIC for Largest Machine Tool Exports from India in FY1516.

We have had a terrific Imtex 2017 in Bangalore this year.

With over 2000 visitors to our booth the response can be said to be overwhelming.

Grind Master is strongly Export oriented with over 50% Turnover Exported to countries like China, USA and UK. Based in Aurangabad in India, the company has Global aspirations. The immensely successful operation in China is a major contributor to Grind Master's international success. Competing with German and Japanese companies on Technology, Build Quality and Service Support Levels, Grind Master has excelled in Microfinishing for Crankshafts and Camshafts, accounting for nearly 25% of the large market in China for these niche machines.

The recent Acquisition of French Machine Tools Builder SPMS also enables us to further strengthen Exports with a foothold in the European market.

Best Regards

Mrs. Mohini Kelkar

Director - Marketing and Business Development

EEPCINDIA
ENGINEERING THE FUTURE

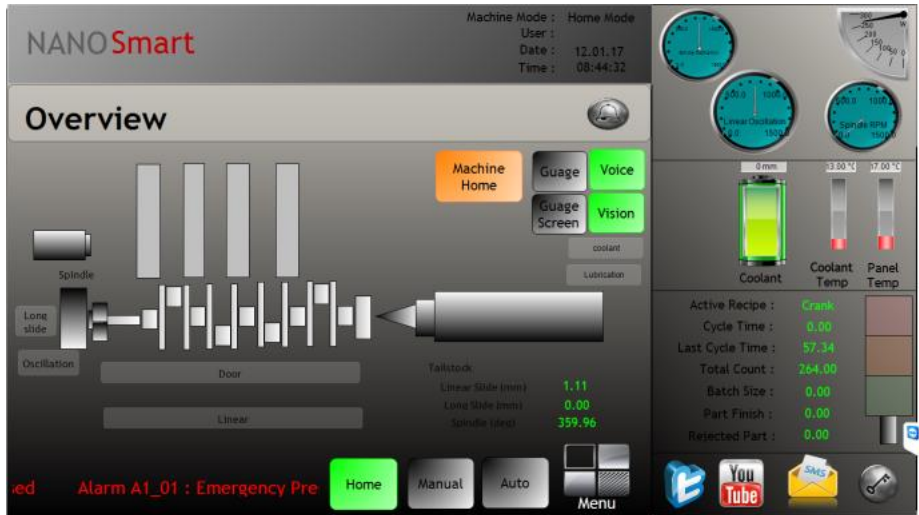

NANOSmart Controller Advanced Industrie 4.0 System from Grind Master

NANOSmart

Industrie 4.0 Compliant
Controller with Maximum
Smart Features

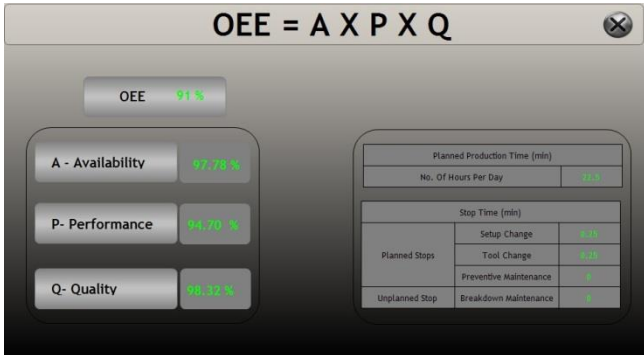

- Engineered Software for Finishing Machines
- Ultra User Friendly
- Predictive Maintenance
- BIG DATA

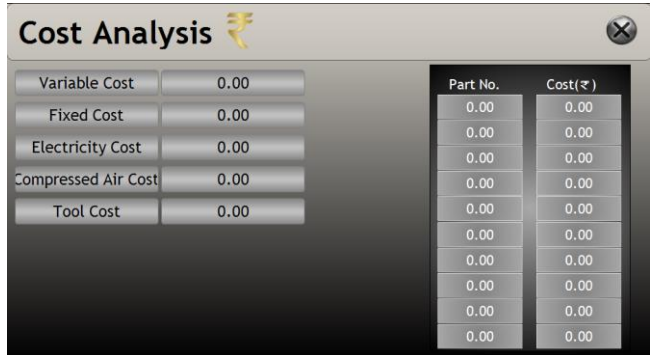

Available as Optional on ALL New Machines and as
Retrofit Option on Existing Machine

Some of the Distinguishing Features :

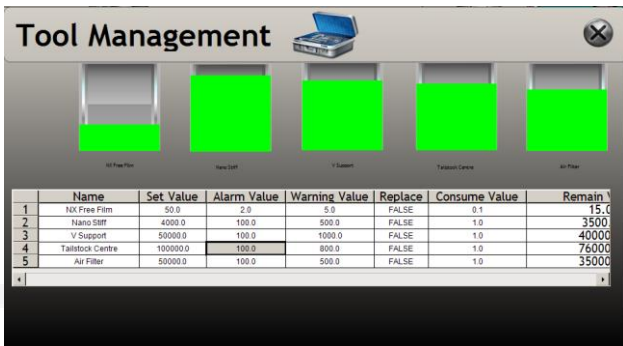

Inbuilt OEE Calculation

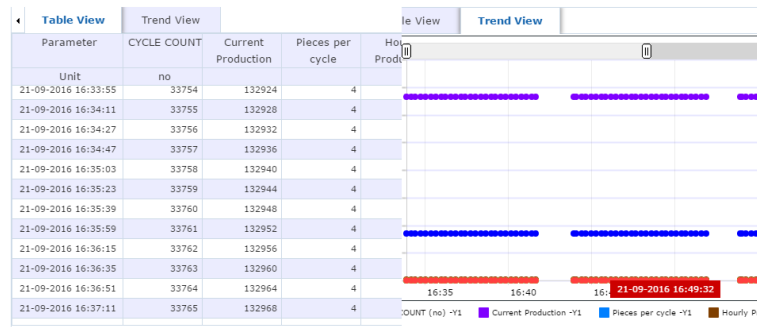

Inbuilt Cost Analysis

Advanced Tool Management System

Remote Asset Management Platform
